

# Solution Story

Scope: Base Porting

Solution area: Integration & Porting

Expertise areas: Symbian, S60, Nomadik platform, UI & frameworks...

Industry: HW Platform providers

# Customer challenge

## -Base Porting

- ▶ Chipset vendor can't sell chips without proper reference SW platforms
- ▶ Rich feature set and time to market are critical factor for OEMs when selecting platform

# The Teleca Solution

- ▶ Vendor concentrated on base area of all platforms
- ▶ Teleca created productized S60 reference platform
  - Teleca provided mature deliveries and committed for fixed delivery schedule in early phases
- ▶ Teleca added required features to core platform
  - Rich feature similar to final products enabled rapid product delivers for OEM's

# Case Data

Project Size	22 Man Years
Project Organisation	Team up to 30 engineers
Bestshoring Solution	Teleca onsite & Teleca Poland
Involved Technologies	S60, Symbian, Nomadik
Involved skill sets	Symbian Baseporting, S60 integration and verification. Driver development: Audio, Camera, USB, Display
Critical Teleca advantage	Accurate and tuned process together with flexible problem solution and fast reactivity Multisided project model and highly competent teams with very special skills

# The Result

- Maturized platform releases were enablers for rapid product deliveries
  - OEM products based on platform available on the customer market
  - Platform branched for different markets
- Strategic partnership with chipset vendor
  - Co-operation based on trust and common goal with strategic partner
